

Craig Stevens Rossi, AIA Associate, Associate

Craig Stevens Rossi has over 20 years of creative and technical experience in architecture and interior design. A graduate of the University of Detroit school of Architecture, his in-depth experience in architecture includes years of site planning, design, and project management. He brings an integrated understanding of every component of the project, from schematic design through construction. This extensive knowledge of the design and construction process is enriched with his detailed knowledge of methods and materials which benefit the schedule and budget of the projects on which he works. His highly creative ability lends an aesthetic quality to all

projects making each a special experience for owner and patron alike. Mr. Rossi's experience in diverse architectural projects range from regional and life style shopping centers, to high-end hospitality and parking facilities. The contribution he brings to the project is invaluable to the design process of the project but also to the construction, budget, return on investment, and ultimate long term satisfaction for the client.
